HUY BUI
COMPUTER SCIENCE

Career Objective

Motivated computer science student in the final year at the University of Saskatchewan, seeking a software developer position to apply my expertise in programming, mobile, and web development. Eager to contribute to innovative projects and enhance user experiences in a dynamic environment.

PROJECTS

FARM MANAGER APP

This is a group project completed by 5 people during my third year in a Software Engineer course, a farm manager app. The main features of this app are organizing data of crop fields, make neccessary calculations, and provide a graph summarizing the data.
This app frontend is built using JavaFX and backend was implemented using java. Data is recorded using MongoDB.

CHANNEL-BASED TOOL WEB APP

Channel-based Tool is a fullstack web app with frontend implemented with ReactJS and backend is implemented in javascript using NodeJS environment. I used ExpressJS for server and data is save in MySQL database.
This web app allows users to log in, create channels, post discussions, comments, replies.
